To: County Council

From: Michael Hurlbert, Director of Community Development

RE: Commission on Environmental Quality

The Community Development Department is submitting the following item for the January 13, 2020 County Council Agenda.

BILL FOR INTRODUCTION:

A bill reducing the number of appointed members of the Commission on Environmental Quality from nine (9) to six (6). In addition to the six (6) appointed members, the Commission retains an additional two (2) ex officio members which are the County's Community Development Director and Public Health Director. As the Commission on Environmental Quality exists for the purpose of advising on environmental quality and the state of the Weldon Spring Project site and surrounding area, which are under state and federal regulatory control, and meets only quarterly, six is a sufficient number of appointed members.
