Local Public Health System Assessment

The Essential Public Health Services are as follows:

1. Monitor health status to identify community health problems.
2. Diagnose and investigate health problems and health hazards in the community.
3. Inform, educate, and empower people about health issues.
4. Mobilize community partnerships to identify and solve health problems.
5. Develop policies and plans that support individual and community health efforts.
6. Enforce laws and regulations that protect health and ensure safety.
7. Link people to needed personal health services and assure the provision of health care when otherwise unavailable.
8. Assure a competent public health and personal health care workforce.
9. Evaluate effectiveness, accessibility, and quality of personal and population-based health services.
10. Research for new insights and innovative solutions to health problems.

Meeting #3

March 28th 2019

@ Sts. Joachim and Ann Care Services

Forces of Change Assessment

- “What is occurring or might occur that affects the health of the community or the local public health system?”
- “What specific threats or opportunities are generated by these occurrences
