WEST PEARCE BOULEVARD AND MEYER ROAD TRAFFIC SIGNAL

Project Location:

West Pearce Boulevard from Cheryl Ann Drive to Meyer Road

Project Description:

The existing two intersections of West Pearce Boulevard with Meyer Road and Cheryl Ann Drive are currently configured as all-way stop controlled intersections. This configuration results in long queues and delays for the corridor during peak hours. The proposed improvements include converting the intersection of West Pearce Boulevard and Cheryl Ann Drive to a 2-way stop controlled intersection. The intersection of West Pearce Boulevard and Meyer Road will be widened and converted to a signalized intersection and will be upgraded for improved pedestrian connectivity with curb ramps, crosswalks, and ADA compliant push buttons. Upon completion of the proposed improvements, it is anticipated that the overall safety and functionality of these intersections will be greatly improved.

Project Status: Project is currently under construction

Project Funding:
