INTERSTATE DRIVE PHASE 4

Project Location:

Interstate Drive from east of South Point Prairie Road at the cul-de-sac on Interstate Drive east to Hepperman Road

Project Description:

This project will provide for a new roadway connection between Hepperman Road and an existing portion of Interstate Drive to the west. Ultimately, upon completion of this project, this road will provide a connection to South Point Prairie Road and David Hoekel Parkway which now provides access to I-70. The new concrete roadway will provide for two 12-foot lanes with 6-foot shoulders. The shoulder will also be constructed of full-depth pavement to allow for future widening and expansion of Interstate Drive to 4-lanes. The new road will be widened at Hepperman Road to provide for a separate left turn lane. To accommodate bicyclists and pedestrians, a 10-foot-wide multi-use path will be constructed on the south side of the road. The path will extend the existing trail along Interstate Drive to eventually connect to Quail Ridge Park to the east. The project will be constructed with an open drainage system but has been designed to easily be converted to a curb and gutter closed drainage system when the road is expanded in the future.

Project Status: Project is currently under construction

Project Funding:

TOTAL	County	Sponsor	Federal	Other	*Savings
\$2,359,547	\$2,359,547	\$0	\$0	\$0	\$59,547
