HANLEY ROAD

Project Location:

Hanley Road north of Feise Road to Pleasant Meadow Drive

Project Description:

This project provides for the reconstruction and improvement of Hanley Road north of its intersection with Feise Road. This project includes reconstructing the two existing 10.5-foot-wide travel lanes with two new 13.5-foot-wide travel lanes. Adjacent to each travel lane will be a 2.5-foot-wide concrete curb and gutter section and a 5-foot-wide sidewalk on both sides of the roadway. The road will be widened to 3-lanes between Feise Road and Brett Ridge Drive/Barrington Lake Drive to provide for left turn-lanes at these intersections. The project will be designed ADA compliant with new curb ramps at all intersections and street crossings. An enclosed storm sewer system will be designed to handle storm water runoff.
