ROUTE A IMPROVEMENTS

Project Location:

Route A from Route 61 to Interstate 70

Project Description:

This project will improve three miles of Route A between Route 61 and Interstate 70 located within the City of Wentzville and unincorporated areas of St. Charles County. The proposed improvements to this MoDOT route will increase safety and improve access for GM employees and freight. The project improvements include resurfacing of the existing pavement and shoulders for the entire project length and pavement widening for the addition of right-turn lanes at all four GM Assembly Plant access entrances and two new truck pull-off lanes for truck staging. The project also includes replacement of two existing signals at GM Assembly Plant access entrances, Gates 2 and 4, and the replacement of existing guardrail to meet current standards. Finally, new continuous lighting will be installed along the entire project corridor along with new conduit and fiber to tie into MoDOT’s Gateway Guide and St. Charles County’s Gateway Green Light networks. MoDOT recently completed pavement repairs along this corridor and rehabilitated the bridge over the railroad in anticipation of this project. The project received \$3.5M in Governor’s Cost-Share funding. The project is also sponsored by City of Wentzville.

Project Status: Construction Summer 2022

Project Funding:

TOTAL	County	Wentzville	Federal	*Other
\$6,371,268	\$2,621,268	\$250,000	\$0	\$3,500,000

*Other: Governor’s Transportation Cost-Share Program
