## NAHM ROAD BRIDGE REPLACEMENT

### Project Location:

Bridge over a tributary of Sehrt Creek on Nahm Road between Highway T and Crow Creek Lane

### Project Description:

This project involved the replacement of a structurally deficient bridge on Nahm Road between Highway T and Crow Creek Lane. The new structure constructed was a 30-foot-wide single box culvert with an overall length of 35 feet which provides for two 11-foot lanes and 2-foot shoulders. The project included minimal roadway work which consisted of removal and replacement of pavement on each approach to the structure.

**Project Status:** Construction Completed
