WILLOTT ROAD BRIDGE REPLACEMENT

Project Location:

Willott Road over Spencer Creek just west of Delray Drive

Project Description:

This project consisted of improvements including pavement widening, new bicycle and pedestrian facilities, a bridge replacement and a new signal. The pavement was widened on the north side of Willott Road between Jungermann Road and Boca Raton Drive/Monique Court to provide for an additional westbound lane. The project also included the removal and replacement of the 3-lane bridge over Spencer Creek just west of Del Ray Drive. The new bridge included accommodations for bicycles and pedestrians. To safely connect these multi-modal users to the Spencer Creek Trail, which crosses at this location, a new underpass was constructed just west of the new bridge to eliminate the need for an at-grade street crossing. Due to this addition, a portion of the existing trail to the north and south of Willott Road was also reconfigured to connect this new underpass crossing to the bicycle and pedestrian facilities on the new bridge. Additionally, the project included the installation of a new traffic signal at the intersection of Willott Road and Del Ray Drive/Covenant Park.

Project Status: Construction Completed
