SOUTH POINT PRAIRIE AND JACKSON ROAD INTERSECTION IMPROVEMENTS

Project Location:

Intersection of South Point Prairie Road and Jackson Road

Project Description:

To improve safety, the project provided for the horizontal and vertical realignment of the existing intersection of South Point Prairie Road and Jackson Road. The old configuration of the roadway was a Y-intersection that allowed for high-speed turns from southbound South Point Prairie Road to westbound Jackson Road. The existing sight distance was also a major concern and both existing roadways were narrow with no shoulders. Therefore, the project reconstructed both roadways with two 12-foot lanes and 4 to 6-foot-wide shoulders. A left-turn lane was provided on Jackson Road for eastbound to northbound movement onto South Point Prairie Road and vertical profile adjustments were made to improve the intersection sight distance.

Project Status: Construction Completed

Original Federal Award: \$277,500

Original County Participation: \$575,000

Final Project TOTAL (Design, R/W & Construction): \$845,030

Final Federal Contribution: \$277,500

FINAL COUNTY Contribution: \$567,530

Completion Year: 2018
